

DA5030 Assignment 01.1 / Getting to Know R

Larkin, Yvonne

September 9, 2025

Question 1

Create file project and R Notebook with relevant assignment details listed above.

Question 2

Load FlightsWithAirlines.csv details into data frame titled *df.flights* from the file's URL.

Question 3

The dataset contains 18 observations (rows) and 14 columns. Each row is information about a flight, including departure and departure delay information. The average mean departure delay is 70 minutes. A total of 3 flights experienced a delay of more than an hour.

Question 4

All flights marked “T” under added *isNight* column, indicate a flight's final departure time was actually at night:

##	flight	tailnum	origin	dest	dep_hr	dep_min	dep_delay	delay_hrs	new_dep
